Introduction

ATS – Advanced Technical Services is an engineering and constructions company. ATS has started its journey back in 2009. ATS specialized in Mechanical Engineering, Electrical Engineering, Supply, Construction, Installation Services, System Assessment, Field Survey, Project Management, Procurement, Implementation, Testing / Commissioning and Assistance Services. ATS has highly skilled manpower and exceptionally talented engineers with vast experiences in their field, providing greater accuracy and efficiency in execution. ATS team are its greatest asset and strength.

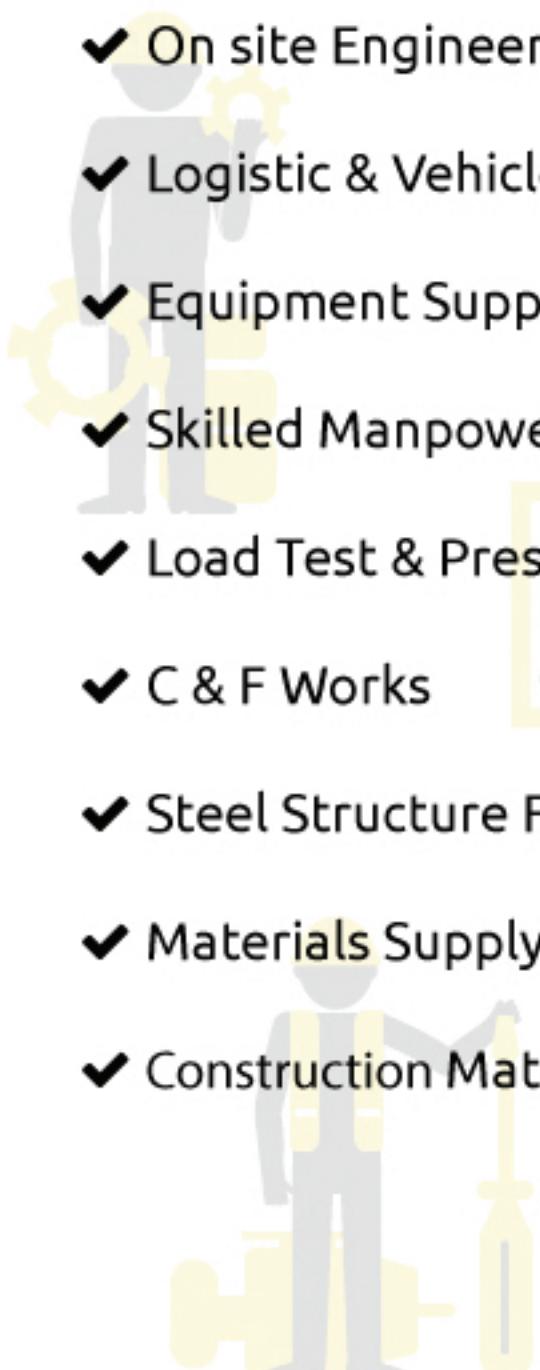

ATS mission is to continually improve and develop for providing better services to meet and exceed customer expectations and contribute to their success. ATS committed to guaranteeing its customers satisfaction so that they can build true and collaborative relations with them, and set itself a reliable, qualified and trustworthy partner.

Service is not a part-time business for ATS but is an integral part of our business strategy. In order to remain successful, we recognize and address the need for continuous investment in terms of human and financial resources, employee training and certification and tools and equipment.
